# I MADE OCY DARMA PUTRA

SysAdmin / DevOps / Backend

Bekasi, Indonesia | ochi@troke.id | 085937007032 | linkedin.com/in/troke | troke.id

## PROFESSIONAL SUMMARY

DevOps and systems engineer with 7+ years of experience building hybrid on-prem and cloud infrastructure across cybersecurity, messaging, ISP, and gaming environments. Proven track record designing CI/CD pipelines, container platforms (Kubernetes, Docker), and observability stacks (Prometheus, Grafana, Graylog). Strong background in virtualization (Proxmox, VMware Tanzu, CloudStack), Linux administration, and secure networking (MikroTik, Ubiquiti). Comfortable owning end-to-end delivery—from provisioning through deployment automation and runtime operations.

## WORK EXPERIENCE

### DevOps Engineer

*PT ITSEC Asia Tbk | Jakarta, Indonesia | April 2023 – Present*

- Operate and maintain 5+ Kubernetes clusters (Rancher, GKE) across dev, staging, and production environments.
- Support deployment lifecycle for 300+ microservices using Helm-based release management.
- Provision and manage Google Cloud infrastructure (GKE, Compute Engine, Storage, IAM) using Terraform.
- Automate cluster provisioning and VM configuration using Ansible; develop reusable Helm charts with environment templating.
- Manage hybrid infrastructure (on-prem and cloud), including observability stack and performance tuning.
- Collaborate with R&D teams to improve CI/CD pipelines, deployment consistency, and SDLC alignment.
- Built production-grade CLI automation tool in Go, converting multi-step manual installation into single-command workflow.
- Designed and deployed air-gapped Kubernetes cluster (k3s) with Ansible provisioning and offline image distribution.
- Managed Proxmox virtualization, VM provisioning, and lifecycle management; supported transition to containerized architecture.
- Implemented monitoring/observability (Grafana, Graylog); managed CI/CD pipelines via Jenkins and on-prem GitLab.
- Established core DevOps tooling (Jenkins, SonarQube, GitLab, BookStack); configured Kong API Gateway and ZeroTier networking.

### Founding Director (Side-Project)

*Datenshi Games Indonesia | Indonesia | April 2020 – Present*

- Founded and scaled Indonesia's first osu! private server and multi-game platform, serving 2,000+ registered users.
- Lead development and operations across backend services in Go, Python, PHP, Java, and Node.js.
- Manage CI pipelines (GitHub Actions), Linux servers, firewalls, monitoring, and service reliability.

### DevOps Engineer (Freelance)

*Fibr Corp. | Jakarta, Indonesia | December 2023 – April 2024*

- Built and maintained infrastructure on VMware Tanzu Kubernetes Grid for microservice-based development.
- Designed CI/CD workflows deploying microservices through Jenkins into Kubernetes environments.
- Managed critical platforms: Keycloak, Kafka/Zookeeper, Harbor, PostgreSQL, and Redis Cluster.

### DevOps Engineer

*PT. ICE Messenger Indonesia | Jakarta, Indonesia | July 2022 – April 2023*

- Developed multi-platform CI/CD pipelines (Jenkins, GitHub Actions, TravisCI, GitLab); built private Docker registry with Harbor.
- Managed bare-metal servers, Proxmox virtualization, and databases (MongoDB, MySQL, Redis, ElasticSearch).
- Implemented Linux firewalls (iptables, fail2ban, UFW), SSH hardening, and reverse proxy routing (NGINX, Cloudflare).
- Deployed monitoring stacks (Prometheus, Grafana, cAdvisor, New Relic); built private cloud with CloudStack and AWS.

### Network Technical Support

*PT Universal Broadband | Bali, Indonesia | February 2019 – July 2022*

- Troubleshot and maintained enterprise/residential network infrastructure using MikroTik and Ubiquiti systems.
- Performed network installation, CCTV integration, and provided technical support for network services.

### Computer Technician

*DISC COMPUTER SYSTEM | Indonesia | August 2018 – December 2018*

- Repaired laptops, PCs, printers, and peripherals; installed OS environments and optimized system performance.

## EDUCATION

**Bachelor's Degree, Information Systems – Universitas Terbuka (Expected Graduation: August 2026)**
**Vocational High School, Computer and Network Engineering – SMK TI Mengwitani (2015 – 2018)**

## SKILLS

- **DevOps & CI/CD:** Jenkins, GitHub Actions, GitLab CI, TravisCI, SonarQube, Harbor, Terraform, Ansible.
- **Containers & Orchestration:** Docker, docker-compose, Kubernetes (Rancher, GKE, k3s, VMware Tanzu).
- **Infrastructure:** Proxmox, CloudStack, bare-metal servers, Linux administration, AWS (EC2, S3, Route53).
- **Networking & Security:** MikroTik, Ubiquiti, ZeroTier, NGINX, Cloudflare, iptables, fail2ban, UFW, SSH hardening.
- **Monitoring:** Prometheus, Grafana, cAdvisor, Graylog, New Relic, Statuspage.
- **Programming:** Go, Python, PHP, Java, Node.js, shell scripting.
- **Services:** Kong API Gateway, Keycloak, Kafka/Zookeeper, MinIO, Redis, PostgreSQL, MongoDB, MySQL, ElasticSearch.

## CERTIFICATIONS & HONORS

- Blue Team Fundamental – CyberWarFare Labs.
- Re-Cloud Challenges Indonesia 2021 – Alibaba Cloud.
- Apsara Clouder: Using OSS to Publish a Static Website & Operate/Manage Object Storage on The Cloud – Alibaba Cloud.
- Learn Basic DevOps & Learn Computer Networking For Beginner – Dicoding.
- Git, Commandline, Node.js Courses – Progate.
- 1st, 2nd, 3rd Place – Microsoft Office Word & Typing Competitions.
