PROFESSIONAL SUMMARY

DevOps and systems engineer with 7+ years of experience building hybrid on-prem and cloud infrastructure across cybersecurity, messaging, ISP, and gaming environments. Works end to end on an engagement: understand the problem, implement it, and stay close to the client while it runs. Strong background in CI/CD automation, container platforms, observability, virtualization, Linux administration, and secure networking.

WORK EXPERIENCE

Forward Deployed Engineer

Freelance | Remote | November 2026 – Present

- Client-facing engineering: scope set by what each client needs, end to end from assessment to the point where it runs without me.
- Work varies per client across infrastructure, automation, and day-to-day operational support.

Junior DevOps Engineer

PT ITSEC Asia Tbk | Jakarta, Indonesia | April 2023 – October 2026

- Cybersecurity internal tools in Go for automation and infrastructure reliability.
- Maintained Kubernetes clusters and hybrid on-prem and cloud infrastructure, including observability and performance tuning.
- Proxmox VM provisioning and lifecycle management; supported the transition to containerized architecture.
- CI/CD through Jenkins and on-prem GitLab, including runner availability and workflow standardization.
- Monitoring with Grafana and Graylog; core tooling set up: Jenkins, SonarQube, GitLab, BookStack.
- VM-to-VM connectivity with static IP and ZeroTier; Kong API Gateway routes unifying backend services.

DevOps Engineer

Fibr Corp. | Jakarta, Indonesia | December 2023 – April 2024

- Infrastructure on VMware Tanzu Kubernetes Grid for microservice-based development.
- CI/CD through Jenkins into Kubernetes; Keycloak, Kafka/Zookeeper, Harbor, PostgreSQL, Redis Cluster.

Founding Director

Datenshi Games Indonesia | Denpasar, Bali, Indonesia | April 2020 – Present

- Founded and scaled Indonesia's first osu! private server and multi-game environment, 2,000+ registered users.
- Backend services in Go, Python, PHP, Java, and Node.js; CI pipelines through GitHub Actions.
- Linux servers, firewalls, logging, and monitoring for highly available game services.

DevOps Engineer

PT. ICE Messenger Indonesia | Jakarta, Indonesia | July 2022 – April 2023

- Multi-platform CI/CD pipelines (Jenkins, GitHub Actions, TravisCI, GitLab); private Docker registry with Harbor.
- Datacenter bare-metal servers, Proxmox virtualization, and databases: MongoDB, MySQL, Redis, ElasticSearch.
- Linux firewalls (iptables, fail2ban, UFW), SSH hardening, reverse proxy and DNS (NGINX, Cloudflare).
- Monitoring stacks (Prometheus, Grafana, cAdvisor, New Relic); private cloud with CloudStack and AWS.

Network Technical Support

PT Universal Broadband | Denpasar, Bali, Indonesia | February 2019 – July 2022

- Troubleshot and maintained enterprise and residential networks with MikroTik and Ubiquiti.
- CCTV installation and network integration; technical support for network services.

Computer Technician

DISC COMPUTER SYSTEM | Indonesia | August 2018 – December 2018

- Diagnosed and repaired laptops, PCs, printers, and peripherals; OS installs and performance tuning.
