I MADE OCY DARMA PUTRA

SysAdmin / DevOps / Backend

Bali, Indonesia | ochi@troke.id | 085937007032 | linkedin.com/in/troke | troke.id

PROFESSIONAL SUMMARY

DevOps and systems engineer with 7+ years of experience building hybrid on-prem and cloud infrastructure across cybersecurity, messaging, ISP, and gaming environments. Works end to end on an engagement: understand the problem, implement it, and stay close to the client while it runs. Strong background in CI/CD automation, container platforms, observability, virtualization, Linux administration, and secure networking.

WORK EXPERIENCE

Forward Deployed Engineer

Freelance | Remote | November 2026 – Present

- Client-facing engineering role where the scope is set by what each client needs at the time, not by a fixed job description.
- Works end to end on an engagement: understand the problem, implement it, and stay close to the client while it runs.
- Work varies per client across infrastructure, automation, and day-to-day operational support.

Junior DevOps Engineer

PT ITSEC Asia Tbk | Jakarta, Indonesia | February 2025 – October 2026

- Developed and deployed cybersecurity-related internal tools, primarily using Golang, to support automation and infrastructure reliability.
- Maintained and enhanced Kubernetes clusters, ensuring stable and secure workloads across environments.
- Managed hybrid infrastructure (On-Prem & Cloud), including server provisioning, observability, and performance tuning.
- Designed foundational automation workflows to align all engineering projects with SDLC best practices.
- Collaborated with R&D teams to improve CI/CD pipelines, environment consistency, and deployment processes.

System Administrator

PT ITSEC Asia Tbk | Jakarta, Indonesia | July 2023 – February 2025

- Oversee deployment and lifecycle management of R&D products across virtualized environments.
- Administer Proxmox, including VM provisioning, lifecycle management, and environment optimization.
- Implement monitoring using Grafana, Graylog, and system-level metrics to ensure high service reliability.
- Manage CI/CD through Jenkins, supporting collaboration between backend and frontend developers.
- Maintain on-premises GitLab, ensuring secure SCM, runner availability, and workflow standardization.
- Participate in the team's transition toward containerization and Kubernetes adoption.

DevOps Engineer

PT ITSEC Asia Tbk | Jakarta, Indonesia | April 2023 – July 2023

- Set up core development tools including Jenkins, SonarQube, GitLab, and BookStack to support CI/CD, code quality, and documentation workflows.
- Provisioned and managed Proxmox VMs (pre-cloud phase), preparing isolated environments for backend and frontend developers.
- Worked directly with engineers to integrate their repositories and automate deployments to VMs using Docker.
- Built Dockerfiles for frontend applications and created docker-compose configurations to simplify local and staging environment setup.
- Researched and implemented early automation in Jenkins, aligning pipelines with each team's repository structure.
- Established VM-to-VM connectivity using static IP configurations and ZeroTier for Zero-Trust networking across different Proxmox nodes.
- Investigated and tested developer-focused services such as MinIO, SeaweedFS, FerretDB, MongoDB, PostgreSQL, and Redis.
- Experimented with Kong API Gateway, configuring routes and services to unify multiple backend services under a single gateway endpoint.

DevOps Engineer

Fibr Corp. | Jakarta, Indonesia | December 2023 – April 2024

- Built and maintained infrastructure on VMware Tanzu Kubernetes Grid, supporting microservice-based development.
- Designed CI/CD workflows to deploy microservices through Jenkins into Kubernetes environments.
- Managed deployments and configurations for critical external platforms such as Keycloak, Kafka/Zookeeper, Harbor, PostgreSQL, and Redis Cluster.
- Supported Git operations and repository structure optimization for engineering teams.

Founding Director

Datenshi Games Indonesia | Denpasar, Bali, Indonesia | April 2020 – Present

- Founded and scaled Indonesia's first osu! private server and multi-game environment, serving 2,000+ registered users.
- Lead development, architecture, and operations across backend services written in Go, Python, PHP, Java, and Node.js.
- Maintain game infrastructure including security, networking, and performance-critical backend services.
- Implement CI pipelines using GitHub Actions and manage deployments using monolithic and service-based approaches.
- Develop documentation for internal teams and community users, improving onboarding and project clarity.
- Manage Linux servers, firewalls, logging, and monitoring to ensure highly available gaming services.

DevOps Engineer

PT. ICE Messenger Indonesia | Jakarta, Indonesia | July 2022 – April 2023

- Developed multi-platform CI/CD pipelines using Jenkins, GitHub Actions, TravisCI, and GitLab Pipelines.
- Built a private Docker registry using Harbor to streamline image distribution across environments.
- Managed datacenter bare-metal servers including deployments, troubleshooting, and service availability.
- Configured reverse proxy routing and DNS using NGINX and Cloudflare.

- Set up and maintained databases: MongoDB, MySQL, Redis, ElasticSearch, including replication setups.
- Managed virtualization with Proxmox for developers (VM & Container workloads).
- Implemented secure Linux firewalls (iptables, fail2ban, UFW) and enhanced SSH hardening.
- Deployed and maintained monitoring stacks: Prometheus, Grafana, cAdvisor, New Relic, and Statuspage.
- Built a private cloud infrastructure using CloudStack and operated AWS (EC2, CloudWatch, S3, Route53).

Network Technical Support

PT Universal Broadband | Denpasar, Bali, Indonesia | February 2019 – July 2022

- Troubleshot and maintained enterprise and residential network infrastructure.
- Installed and configured networks using MikroTik (DHCP, VPN, Firewall, Hotspot, Queue, RouterOS API) and Ubiquiti systems.
- Performed CCTV installation, maintenance, and network integration.
- Provided customer education and technical support for network services.

Computer Technician

DISC COMPUTER SYSTEM | Indonesia | August 2018 – December 2018

- Repaired laptops, PCs, printers, and peripheral devices, diagnosing hardware/software issues.
- Installed OS environments and optimized system performance.
- Supported school clients with scheduled maintenance and IT troubleshooting.

EDUCATION

Bachelor's Degree, Information Systems — Universitas Terbuka (Expected Graduation: August 2026)
Vocational High School, Computer and Network Engineering — SMK TI Mengwitani (2015 – 2018)

SKILLS

- **DevOps & Automation**: Jenkins, GitLab CI, GitHub Actions, TravisCI, Docker, Docker Compose, Kubernetes
- **Infrastructure**: Proxmox, VMware Tanzu, Bare-metal, CloudStack, AWS, Linux
- **Backend & Tools**: Golang, Python, Node.js, PHP, Java
- **Networking & Security**: MikroTik, Ubiquiti, ZeroTier, Firewall, SSH Hardening, VPN
- **Monitoring & Logging**: Grafana, Prometheus, Graylog, cAdvisor, New Relic
- **Databases & Storage**: PostgreSQL, MongoDB, MySQL, Redis, ElasticSearch, MinIO

CERTIFICATIONS & HONORS

- Blue Team Fundamental — CyberWarFair Labs
- Re-Cloud Challenges Indonesia 2021 — Alibaba Cloud
- Apstra Clouder: Using OSS to Publish a Static Website & Operate/Manage Object Storage on The Cloud — Alibaba Cloud
- Learn Basic DevOps & Learn Computer Networking For Beginner — Dicoding
- Git, Commandline, Node.js Courses — Progate
- 1st, 2nd, 3rd Place — Microsoft Office Word & Typing Competitions
